Professional Summary

Frontend Developer with experience building responsive web applications and enterprise dashboards using **React.js**, **TypeScript**, **JavaScript**, and modern **frontend architecture**. Skilled in **reusable component development**, **state management**, **REST API integration**, **performance optimization**, **accessibility**, **authentication**, and **production debugging**. Experienced in developing workforce analytics solutions with **React**, **TypeScript**, **Redux Toolkit**, **React Query**, **MUI**, **Vite**, **Node.js**, **Express.js**, and **SQLite**.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python, SQL
Frontend: React.js, Redux Toolkit, React Query, Context API, MUI, Vite, Recharts, Responsive Web Design
Backend & APIs: Node.js, Express.js, REST APIs, SQLite, better-sqlite3, Socket.IO
Testing & Quality: Vitest, React Testing Library, Playwright, Unit Testing, Integration Testing, Accessibility
Developer Tools: Git, GitHub, Postman, Chrome DevTools, VS Code, JIRA, Docker, CI/CD
Core Competencies: Component Architecture, State Management, API Integration, Performance Optimization, RBAC/ABAC, Authentication, Responsive UI, Accessibility, Debugging

Professional Experience

Stackly **Bengaluru, India**
Frontend Developer *Jul 2026 – Present*

- Develop enterprise **workforce analytics interfaces** using **React.js**, **TypeScript**, **MUI**, **Vite**, and reusable **frontend components**.
- Build **role-based dashboards** for Admin, HR, Manager, Team Lead, and Employee workflows with responsive layouts and reusable UI patterns.
- Improved **First Contentful Paint (FCP)** by approximately **25%** through **frontend performance optimization**, component improvements, and efficient rendering strategies.
- Developed **15+ reusable UI components and widgets**, contributing to approximately **20% reduction in frontend delivery effort**.
- Optimized **Redux Toolkit** and **React Query** state and data flows to reduce redundant requests and improve application responsiveness, contributing to approximately **30% lower API latency**.
- Integrated **REST APIs**, **authentication**, **authorization**, **role-based access control**, and **real-time application workflows**.
- Collaborated with UI/UX and backend developers to translate requirements into responsive, maintainable, **production-ready interfaces**.
- Participated in **debugging**, **code reviews**, API integration, feature refinement, and **frontend architecture** decisions.

Exner Technologies **Hyderabad, India**
Software Developer *Apr 2025 – Jun 2026*

- Developed and integrated client-facing **REST API** features for production web applications with focus on reliability and maintainability.
- Contributed to release processes achieving approximately **99.8% release reliability** through **testing**, debugging, code reviews, and structured development practices.
- Refactored frontend components into **modular and reusable architecture**, contributing to approximately **18% reduction in application bundle size**.
- Built **Python and SQL automation workflows** that reduced repetitive manual work by approximately **5 hours per week**.
- Increased **automated test coverage** from approximately **60% to 82%** through unit testing, integration testing, regression testing, and code reviews.
- Investigated production issues using **Chrome DevTools**, API inspection, application logs, network analysis, and systematic **debugging**.
- Collaborated with developers and stakeholders to troubleshoot issues, implement enhancements, and improve **software maintainability**.

Projects

Workforce Analytics Dashboard

React.js, TypeScript, Redux Toolkit, React Query, MUI, Vite, Node.js, Express.js, SQLite

- Developed an enterprise **workforce analytics dashboard** supporting **role-based experiences** for Admin, HR, Manager, Team Lead, and Employee users.
- Implemented **KPI cards**, analytical charts, filters, data tables, **attendance workflows**, employee information, and responsive dashboard layouts.
- Built reusable **React components** and frontend architecture patterns to maintain consistency across role-specific dashboard experiences.
- Integrated **REST APIs** with **SQLite-backed services** and implemented client-side and server-state management using **Redux Toolkit** and **React Query**.
- Implemented **role-based authorization** and scoped access patterns to protect dashboard data and user workflows.
- Developed **attendance workflows** covering check-in, break, resume, checkout, corrections, approvals, and employee activity data.
- Applied reusable **MUI design-system components** and **responsive UI** patterns for consistent enterprise application experiences.

Real-Time Analytics Dashboard

React.js, TypeScript, REST API, Recharts

- Built an interactive **analytics dashboard** supporting multi-metric filtering, search, data visualization, and responsive reporting workflows.
- Developed reusable **chart and data-display components** for presenting business metrics and analytical information.
- Optimized rendering for datasets containing **10,000+ records** using efficient data handling and component rendering strategies.
- Integrated **REST API data** with visualization components and handled loading, empty, error, and successful data states.

Responsive Web Application Architecture

JavaScript ES6+, HTML5, CSS3, REST API

- Designed a modular **single-page application (SPA)** architecture with client-side routing, reusable components, error handling, and persistent application state.
- Implemented asynchronous loading, error, empty, and **optimistic UI states** to improve user experience.
- Structured frontend modules to improve **maintainability, separation of concerns**, and component reuse.
- Integrated **REST API workflows** and handled asynchronous operations with appropriate user feedback and failure states.

Education

B.Tech – Computer Science and Engineering

2020 – 2024

*Bapatla Women’s Engineering College
Acharya Nagarjuna University*

College Projects:

- **DeepFake Face Detection** using LSTM
- **Rock Paper Scissors**

Intermediate – MPC

2018 – 2020

Vignan Girls Junior College

10th Class

2017 – 2018

Srinivasa High School

Certifications

- **Google Cloud Generative AI – Skill Boost**, 2025
- **Frontend Web Development Certification**

Additional Information

- Experienced with **Agile development**, Git-based workflows, **code reviews**, issue tracking, and collaborative software development.
- Strong interest in **frontend architecture**, scalable **React applications**, **performance engineering**, testing, and developer tooling.
